

Rear Commodore Newhaven Board Report

Feb 2019

1. Sea Safety Boat Subcommittee

The launch Seaford Sea Safety Skippers Handbook, with a presentation, is planned for this Friday 22nd Feb

The refresher/upskill training starts on Sat 23rd Feb by Paddy, assisted by JO/Geraldine & Bill and continues as the NSSC Calendar

The sub committee has offered to run the refresher/upskill scheme for at least a year to get it established and to implement any improvements identified.

I would like to mention the many hours over the last four months that Jo, Geraldine, Paddy, Rupert, Chris & Jonty have put in to get this scheme up and running and the sea safety boats upgraded and seaworthy, without them it would not have been possible.

2. Ark & Ribs

The planned launch date is tomorrow, Tue 19th Feb 2019

3. Seaford & Piddinghoe Premises Management

Plumbing works to the Seaford showers and galley hot started on Tues 5th Feb, with completion planned by working party day of 23rd March

As there is a commercial premises within the club house with employees, Chas Humphries is of the opinion that fire alarms and emergency lighting is needed to comply with legislation. Alan Oatway is currently working out a budget figure

I am behind with the asbestos audit, which should have taken place last month, I will plan to get it completed within the next four weeks

4. Woman PB2 Instructors

Jo & Geraldine had put their names forward, but the cost was prohibitive. As there are no active woman club instructors, if there were, there may be an income stream for woman only courses ?
