

Rear Commodore Newhaven Board Report

November 2018

1. Sea Safety Subcommittee

As programme and currently all satisfactory. Geraldine and Jo have asked to go on the next PB2 Instructors course.

Board Decision Required: Input is needed by others to ensure there are sufficient resources for RO's & ARO's for next season.

2. Ark Damage Update

My insurance claim of £5399.07 has been accepted and payment less £250 excess has been made

Lochin Marine completed the insurance work on 2/11/18

3. Ark, Grey Rib & Orange Rib – Winter Works

All now de commissioned. A list of repairs, maintenance and upgrades has been prepared and is currently being costed for treasurer approval.

4. Seaford Showers, Basin Hot water & Galley Hot Water

Works are planned to start in February for completion by mid March. Anticipated costs are circa £9000.00 incl. Vat

Board Decision Required : To proceed with the works

5. Seaford Asbestos Management

I carry out random/unrecorded/ Informal visual inspections when on the premises, so far things appear satisfactory. Formal inspection and specialist external audit are planned for January.

6. Seaford – Premises Management.

Despite best intentions, there is a history of un coordinated, wasted, not properly designed work, non compliance with legislation etc..occurring..

Board Decision Required: I propose that a premises subcommittee,(to include Piddinghoe ?) comprising of people with the required complementary skills is set up to address this. I would volunteer for this.

Bill Wates 7/11/18
